# Introduction

---

Social networks have become a **crucial platform for companies**. According to reports, a new user registers on a social network every 15 seconds, and more than 53% of the world's population is present on these platforms. In Spain, 85% of Internet users between the ages of 16 and 65 use social networks, and almost half of them follow a brand.

For **SMEs and freelancers**, this represents a **great opportunity to promote their businesses, connect with customers and increase sales**.

# What is a social network and which ones do businesses use?

> Social networks are **digital platforms** that allow individuals and companies to **create free profiles to interact**, share content and communicate with other users.

# Conclusion

---

The use of social networks is essential for **SMEs and freelancers**, both for those who sell online and for more traditional businesses. It is important to **focus on the most popular social networks** and where your **target audience** is.

It is necessary to **invest time** in creating thoughtful profiles and encouraging interaction with users. To be successful, a **strategy and content** plan is required, as well as the use of free **social media** management tools and the **creation of designs** that reflect a **creative and professional brand image**.

To sum up, the strategic use of social media is accessible to all businesses, and it is essential to create quality content and establish a solid online presence.
